ELLIPSIS DRIVE

Welcome Ellipsis Drive!

Ellipsis Drive simplifies geospatial data management, converting raw geographic data into live, interactive maps. Its fully interoperable software automates data ingestion, management and integration, enabling quick and secure access from any workflow. This allows seamless use in any application, query or tool, making analysis and visualization easier.

Dialogue Series

We've introduced a new section on the Outreach page called the '*Dialogue Series*'. This initiative features short discussions with NoR providers, offering insights into their services and how they support the Earth Observation community. Through just three key questions, providers share their experiences, innovations, and unique contributions. If you're looking to better understand NoR's offerings and their real-world impact, the 'Dialogue Series' is the place to start!

On the Outreach page, you can also find **webinar replays**, past **newsletters**, and other resources to stay informed about the latest developments in NoR.

Exclusive deep dive into the future of EO cloud services

In this first *Dialogue*, VITO's remote sensing experts reveal how the Copernicus Data Space Ecosystem and Terrascope openEO services are empowering researchers, developers, and service providers with scalable cloud solutions. Discover how seamless data access, powerful processing capabilities, and flexible API integration are transforming EO workflows—and how user needs are evolving.

Did you know?

You can add training to your sponsorship request!

When browsing the NoR portfolio, you can filter by *Service Type* and select *Training* to find providers offering training sessions. This means you can include specialised training in your sponsorship request, ensuring you get the knowledge and support needed to make the most of desired cloud services.
